THE MOBILITY REVOLUTION

Troubador Publishing Ltd Jan 2015, 2015. Taschenbuch. Book Condition: Neu. 216x140x10 mm. Neuware - 'Urban mobility is undergoing a revolution as cities face more and more pressure to get people around whilst simultaneously making cities more livable, greener and cleaner. Three key trends - zero emissions, zero accidents, and zero ownership - are playing a significant role in starting to redefine how we live, work, and move within our cities.' Isabel Dedring London's Deputy Mayor for Transport 'In his fascinating tour-de-force of the mobility revolution, Lukas Neckermann takes us to the other side of current transportation systems. He paints a compelling picture where we are only a few years away from a disruptive turn in the automobile industry. This transformation, he assures us, has been well paved with mounting evidence that our current way of dealing with transportation is doomed in the light of ecological, social and economic imperatives. According to him, the new world of physical mobility is a thrilling combination of three zeroes - emissions, accidents, ownership. Neckermann's book is the dynamite to clear our minds in order to see how the future takes shape in our key industries and in our ever more nomadic ways of life.' Professor Markku Wilenius Finland Futures Research Centre, Turku School of Business 184 pp. Englisch.
